```

List the name of the managers with the maximum employees.

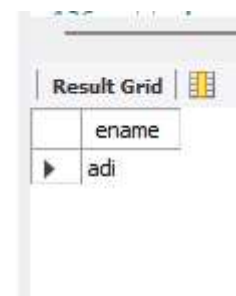

```
select ename
from employees
where empno in (select mgrno
from employees group by mgrno having count(empno)=(
select count(empno) from employees group by mgrno order by count(empno) desc limit 1));
```

Result Grid	
	ename
▶	sukumar

Display those managers name whose salary is more than average salary of his employee.

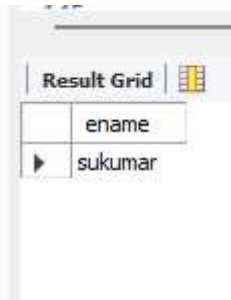

```
select a.ename
from employees a
where a.sal > (select avg(e.sal)
from employees e
where e.mgrno=a.empno group by e.mgrno);
```

Result Grid	
	ename
▶	adi

Find the name of the second top level managers of each department.

```
select ename
from employees
where empno in (select distinct mgrno
from employees
where empno in (select distinct mgrno from employees ));
```

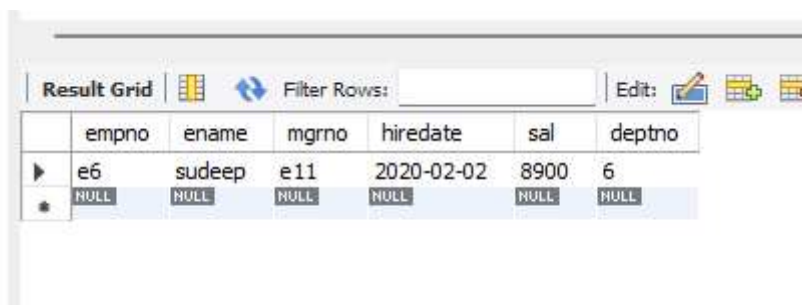

The screenshot shows a 'Result Grid' window with a single row containing the name 'sukumar' under the column 'ename'.

ename
sukumar

Find the employee details who got second maximum incentive in January 2019.

```
select * from employees
where empno in( select empno from incentives
where incentive_date between '2019-01-01' and '2019-12-31'
and incentive_amount=(select max(incentive_amount) from incentives where incentive_date
between '2019-01-01' and '2019-12-31'));
```

The screenshot shows a 'Result Grid' window with a table containing employee details. The first row shows employee 'e6' (sudeep) with manager 'e11', hired on '2020-02-02', salary '8900', and department '6'. The second row shows all NULL values.

	empno	ename	mgrno	hiredate	sal	deptno
▶	e6	sudeep	e11	2020-02-02	8900	6
*	NULL	NULL	NULL	NULL	NULL	NULL
